AI Strategy & Digital Transformation Leader

Strategic Operations | Technical Program Management | Documentation & Governance | Cross-Functional Leadership

AI strategy, product, and technical program leader with 7+ years of experience translating complex business needs into scalable digital products, operating models, and implementation plans. Conceived, designed, and built three custom internal applications for Breitbart News Network spanning product simulation, subscription intelligence, and AI-assisted creative production.

AI Product & Digital Transformation Capabilities

- **AI product strategy and solution design:** identify high-value business problems, define product vision, prioritize features, and translate operational needs into practical AI-enabled applications and implementation roadmaps.
- **Application development and rapid prototyping:** design and build custom internal web applications, interactive prototypes, dashboards, command centers, and workflow tools using modern AI-assisted development platforms.
- **AI workflow orchestration:** combine large language models, structured prompts, business rules, APIs, data sources, and human review processes to create reliable end-to-end workflows.
- **Requirements and technical translation:** convert stakeholder needs into user flows, data requirements, system behaviors, acceptance criteria, governance controls, and engineering-ready documentation.
- **Governance and responsible adoption:** establish permissions, review processes, documentation standards, cost controls, security requirements, and human oversight for scalable AI use.
- **Cross-functional delivery and enablement:** lead discovery, demonstrations, testing, refinement, implementation planning, onboarding, and adoption across technical and non-technical teams.

CERTIFICATIONS

- AI for Business Specialization, University of Pennsylvania, May 2024
- Prompt Engineering Certification, Vanderbilt University, April 2024
- Salesforce Associate Certification, Salesforce, April 2023
- Google IT Support Professional Certificate, Google, October 2022
- Professional Scrum Master I, Scrum.org, October 2022
- The Ultimate SQL Bootcamp, Udemy, December 2022
- Excel Skills for Data Analytics and Visualization, Macquarie University, February 2024

PROFESSIONAL EXPERIENCE

BREITBART NEWS NETWORK — Digital Product, Growth & AI Operations Lead | 2024–Present

- Conceived, designed, and built three custom internal web applications that centralized product planning, subscription intelligence, and creative production for editorial, marketing, product, and executive teams.
- Built the **Breitbart Feature Simulator**, an interactive product-planning platform used to prototype website features and redesign concepts, visualize responsive experiences, compare proposed improvements, and translate audits and ideas into implementation-ready requirements.
- Built the **Breitbart Fight Club Command Center**, a subscription growth and operations platform consolidating subscriber, revenue, acquisition-funnel, marketing, content-engagement, and member-lifecycle information into a centralized decision-making environment.
- Built the **Breitbart Asset Command Center**, an AI-assisted creative production platform for prompt-driven creation and editing of thumbnails, advertisements, social graphics, campaign packages, charts, maps, and StreamYard presentation boards.
- Designed application workflows, information architecture, user experiences, dashboards, data structures, AI-assisted features, API integration plans, permissions, governance controls, and phased product roadmaps.
- Led stakeholder discovery, requirements definition, iterative prototyping, demonstrations, testing, prioritization, and implementation planning across editorial, subscription, marketing, product, and engineering functions.
- Translated complex operational needs into practical internal software, allowing small cross-functional teams to replace fragmented spreadsheets, documents, design tools, and manual processes with centralized systems.

DELOITTE — Business Analyst (CA DMV VR Project) | 2023–2024

- Led 50+ stakeholder refinement sessions, synthesizing ambiguous requirements into clear, structured documentation for engineering teams.
- Authored high-quality user stories, acceptance criteria, and process flows across 15+ transactional systems, improving onboarding and execution consistency.
- Created data mapping and integration frameworks between legacy DMV systems and Salesforce, supporting scalable technical architecture.
- Operated as the primary liaison for multiple feature areas, ensuring alignment, governance adherence, and transparent communication.
- Facilitated demos and decision-making touchpoints with senior product owners, strengthening clarity and expectation alignment.

ENTREPRENEUR / BUSINESS OWNER | 2020–2023

- Built and documented operational processes across finance, service delivery, and customer communication.
- Improved profitability and efficiency through workflow optimization and data-informed decision-making.
- Managed all aspects of business operations, demonstrating autonomy, adaptability, and end-to-end ownership.

EARLY CAREER EXPERIENCE

Additional early roles in systems integration, inventory management, and supply chain operations provided foundational experience in process design, cross-functional coordination, operational documentation, and systems improvement.
